Passes Intercept	2	3
Fumbles lost by	3	4
Punts/Ave.	7-28.9	3-40.3
Penalties	8-51	6-70

The Appomattox Raiders built up a 27-0 lead at the half and went on to beat the Staunton River Golden Eagles 34-6 last Friday night in a Seminole District football game played at Staunton River. The Raiders are now 2-0 overall and 1-0 in the district, Staunton River saw their record go to a 1-2 mark overall.

The Raiders got on the scoreboard first with 10:04 left in the first quarter as a result of a fumble on a punt attempt when Billy Guthrie recovered the ball in the end zone for a 6-0 lead as the extra point missed. In the second quarter, the Raiders scored three times and Phillip Goode kicked three extra points for their 27-0 lead, Goode scored the first touchdown of that quarter with 9:54 left in the half on a 15 yards run. Before the Raider quarterback came back about four minutes later with 5:45 to go in the half and hit Bill Austin with a 27 yard pass for a score and with 1:18 to go he connected with Nathan Snell on the other end of a touchdown pass, that one also a 27 yard toss.

Appomattox took the kickoff in the second half and went 60 yards in seven plays for a score with Layne going in from seven yards out with 9:14 to go in the third quarter and Goode kicked the points after for a 34-0 lead. After that score a lot of new faces came into the Raiders lineup, both offensively and defensively. Terry Mullins, the Golden Eagle quarterback, scored from two yards out with 5:49 left in the third quarter.

Glenn Doss led the Raiders in rushing with 78 yards in 10 carries, most of these yards coming in the third quarter. Phillip Goode was next with 73 yards in nine carries while Bobby Layne and Kent Hancock had 48 and 41 yards rushing respectively. Layne also threw for two touchdown passes, scored once and averaged 40.3 punting.

Billy Guthrie recovered two fumbles for the Raiders and was in on seven tackles. Warren Coleman had seven tackles and three assists to be the other big man on the line. Mike Gallier was in on six tackles and Ricky Book had three tackles and two pass interceptions. Ed Jamerson had a fumble recovery and Phillip Goode also had a pass interception. The defense was sparked late in the second half by an inexperienced group, but got the job done as the Golden Eagles only score resulted on a fumble by the Raider offense and was finally turned into a score.

The Raiders controlled the game in just about all departments. Both teams rushed the same number of times, but the Raiders were more than double SR in the rushing, 251 to 96. Appomattox was 305 to 138 in total offense.

The Raiders open their home season Friday night when they take on Liberty High School at 8 p.m.

Appomattox – 6 21 7 0 – 34
Staunton Ri– 0 0 6 0 – 6

Appomattox Scoring:

A – Guthrie recover fumble in end zone (kick fail)

A –Goode 15 yd run(Goode kick)

A –Austin 27 yd pass from Layne (Goode kick)

A – Snell – 27 yd. pass from Layne (Goode kick)

A – Layne 7 yd run (Goode kick)

SR –Mullins 2 yd. run (Run fail)

HUNT CLUB TO SPONSOR SHOOTING MATCHES

The Chestnut Mountain Hunt Club will hold five shooting matches at Herndon's Store in Stonewall, beginning Saturday, Sept. 23, continuing through Saturday, Oct. 21. The matches will begin at 1:00 p.m. each Sat.

Prizes will be hams and turkeys.

All club members are expected to assist with this project.

Players Of The Week

Nathan Snell, on the left, and Billy Guthrie, on the right, have been named "Players of the Week" by the coaching staff at ACHS for their performances in the ACHS Raider – Staunton River game played on Friday night at Staunton River. Both players will receive a dinner compliments of Maude's Restaurant.

Snell, Tight End and Defensive Safety, was selected for his outstanding offensive blocking and fine defensive play. A senior two-year letterman, Snell was named to "Who's Who In American High Schools" recently.

Guthrie, Co-Captain of the Raiders, recovered two fumbles and scored one touchdown in the 26-6 win over Staunton River Friday night. Guthrie, a senior tackle, was named to All-District last year. His quickness and size makes him one of the top college prospects in the area.

New D&B Market Analysis Helps Rate Sales Effort

A new service that allows a business man to relate sales performance to marketing effort has been developed by the Marketing Services Division of Dun & Bradstreet, Inc.

Called the DunMARC Customer Analysis Service, it gives the businessman a clear picture of how he is doing in his markets.

In announcing the new service, Joseph P. Saner, division vice president, described the benefits for marketing executives.

"The Customer Analysis Service links actual sales performance to a businessman's markets and provides answers to such questions as 'What are my best markets? How big are they? How much of a market do I have? and Where are my sales dollars coming from?

"Armed with the answers to these questions, an executive can take effective action aimed at improving sales and profit performance."

This kind of tie between sales dollars and market performance has never been available, he said. And to supplement D & B can provide additional marketing and sales aids for the businessman to use in overcoming any sales weakness or to take advantage of any market opportunity.

The new service is the company's second offered in the DunMARC product line. DunMARC, for Dun's Market Analysis Research and Control, represents a series of advance marketing services that allow executives to use Dun & Bradstreet's computers and information files in analyzing various aspects of business.

Additional details about the DunMARC Customer Analysis Service are available from Lee R. Van Vechten Regional Manager, Marketing Services Division, Dun & Bradstreet Inc., 3 Penn Center Plaza, Philadelphia, Pa. 19102, (215) 56[illegible]

Each Child is Different When He Has A Body Chemistry Defect

by Neil R. M. Buist, M.B., Ch.B.
Associate Professor of Pediatrics and Director . March of Dimes Metabolic Clinic, University of Oregon Medical School

The body's chemical processes fit together in an intricate pattern. If one crucial step is off, the whole well-being of the human involved is often tragically affected.

This is what happens with a metabolic disorder. The body's chemistry has been distorted. Such disorders are called "inborn errors of metabolism" because they are inherited.

Inborn errors can be all the more dangerous than the birth defect that puts a child on crutches, since children with metabolic defects often look perfectly normal. The damage only starts to occur after birth, when they don't have access to their mother's blood through the placenta.

Some of these disorders cause severe bodily or brain damage within a few weeks of birth. Others are more subtle and may lie hidden (or latent) for months and sometimes for many years. In such cases, disorders that are undiagnosed get no treatment or the wrong treatment.

GROWING AGAIN. Dr. Neil Buist, head of the March of Dimes clinic for metabolic disease in Portland, Ore., congratulates Tonya Fronatt, 10.

Lack of hormone

That is the reason for the March of Dimes Metabolic Clinic at the University of Oregon Medical School here in Portland. We must find the children who have these inborn birth defects of body chemistry and see that they get the hospital care and follow-up they need.

It is becoming increasingly possible to correct this kind of error. One of our patients, Tonya Fronatt, produces a low level of human growth hormone (HGH) in her pituitary gland. She is 10, but she is tiny and looks much younger. The lack of this hormone has also been the cause of the hypoglycemia that has sporadically thrown her into severe convulsions since she was three days old.

HGH is rare because it must be extracted from human pituitaries. The HGH from about 2,000 human pituitary glands would be needed to help her grow to normal size. But regular injections of the chemical have brought an end to her convulsions and she is now growing very well on it
